

## METTUR THERMAL POWER PLANT SIDING

### MAIN ACTIVITIES

- This is a wagon maintenance depot catering coal to the Tamil Nadu Electricity Board. The depot deals with coal rakes of BOXN wagons received from Chennai Harbour. Unloading of coal is by tipping.
- Receipt and dispatch of coal rakes at an average of 3 to 4 rakes per day.
- Certification of loaded BRN/BOST wagons with steel plates for correct lashing before dispatch at MCSI (MCRD) siding at an average of 0.3 trains per day.
- Certification of empty BOXN rakes for any damages during manual unloading before dispatch at MCSI (MCRD) siding at an average of 1.9 trains per day.

### SICK LINE

- Three sick lines with a holding capacity of each 10 BOXN wagons are available. A covered shed to accommodate 2 BOXN wagons is also available in sick line.
- An average of 0.5 sick wagon per day is attended.
