प्रेसक्षवज्ञप्ति/PRESS RELEASE

**CHENNAI DIVISION TO OFFER MULTI-LEVEL PARKING FACILITY AT CHENNAI
EGMORE RAILWAY STATION THROUGH E-AUCTION**

Chennai Division of Southern Railway has announced an e-auction for the operation and management of a newly developed multi-level parking facility at the **Multi-Functional Complex (MFC)** located within the premises of Chennai Egmore Railway Station.

As part of the ongoing station redevelopment initiatives aimed at enhancing passenger amenities and infrastructure, Indian Railways has constructed two Multi-Functional Complexes at Chennai Egmore Railway Station. These complexes are situated on the Gandhi-Irwin Road side and the Poonamallee High Road side of the station. The buildings have been designed to accommodate commercial retail establishments as well as organized multi-level parking facilities.

The multi-level parking floors at the MFC building on the **Gandhi-Irwin Road side** have now been completed and are ready to be brought into operation. In this regard, Chennai Division has **invited bids** through an **e-auction** process for the operation of the parking facility.

The proposed contract covers the operation and management of parking spaces located on the **2nd, 3rd and 4th floors** of the MFC building. The selected licensee will be responsible for regulating vehicle entry and exit, maintaining systematic parking arrangements, ensuring cleanliness of the premises, and deploying adequate manpower to facilitate smooth operations.

In addition to vehicle parking, the successful bidder will be permitted to introduce value-added services within the designated parking floors. These may include facilities such as **Pay & Use Toilets, Electric Vehicle (EV) Charging Stations** and **other essential passenger-oriented services**, subject to prior approval of the Railways. Charges for such services will be determined on a market-oriented basis.

The e-auction process has been adopted to ensure transparency and to enable wider participation from eligible and experienced operators. The contract will be awarded to the highest eligible bidder in accordance with the prescribed terms and conditions.

The multi-level parking facility is expected to provide greater convenience to passengers and visitors by offering organized parking space within the station premises. The facility will also help reduce congestion around the station area and support smoother vehicular movement near the terminal.

The vehicular movement pathway for accessing the parking floors will follow the layout specified in the e-auction catalogue. However, the arrangement may be revised in the future in line with the planned redevelopment works at the station to further improve passenger circulation and overall station infrastructure.

The **e-auction is scheduled to be conducted through the Indian Railways e-procurement portal (www.ireps.gov.in) on 20th March 2026 at 15:30 hrs.** Interested bidders may access the detailed e-auction notice, eligibility criteria, and bid documents through the portal.

For further information, interested parties may contact:

Office of the Divisional Railway Manager

Commercial Branch, II Floor, NGO Annexe
Park Town, Chennai – 600003.

Through this initiative, **Chennai Division of Southern Railway continues its efforts to enhance passenger amenities and ensure efficient utilization of infrastructure at Chennai Egmore Railway Station.**
